A. NEUBERGER
B. SPENCER
R. WHITTAM*†

* *Ex-officio* Member of Committee. ‡ Symposium Organizer. ‖ Co-opted Member of Committee.
† Representative of Editorial Board of the *Biochemical Journal*.
§ Representative of Editorial Board of *Clinical Science*.

The Biochemical Society exists to advance the science of biochemistry through meetings and publications. About 10 meetings a year are held, each at a different place; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Members receive the *Biochemical Journal* without further payment. Details of facilities accorded to Members, and forms of application for membership, are available from the Administrative Secretary, Mr G. McHardy, The Biochemical Society, 20 Park Crescent, London, W.1 (LANgham 9849).

The *Biochemical Journal* is published by The Biochemical Society and distributed for the Society by The Chemical Society. The *Journal* is issued in four volumes a year, published in three parts at intervals of one month. The index for each volume is issued separately, usually with the second part of the succeeding volume.

Subscriptions to the *Biochemical Journal*. For non-members of The Biochemical Society the subscription to the *Journal* is £22 per year (£5. 10s. per volume); for non-members in the United States of America the subscription is $62 per year ($15.50 per volume). All subscriptions are payable in advance and should be sent to The Publications Sales Officer, The Chemical Society, Burlington House, Piccadilly, London, W.1.

Claims about issues lost or damaged in transit should be made to The Publications Sales Officer, The Chemical Society, Burlington House, Piccadilly, London, W.1, and will not be entertained if they are received later than three months after the date of posting of the *Journal*.

Back Numbers. Enquiries for volumes 1–19 should be addressed to William Dawson & Sons Ltd., Back Issues Department, 16 West Street, Farnham, Surrey. Quotations for available issues of subsequent volumes and parts may be obtained on application to the Johnson Reprint Co. Ltd., Berkeley Square House, Berkeley Square, London, W.1, or to The Chemical Society.

Advertisements. Applications for advertising space should be sent to Mr R. Warden, Aldridge Press Ltd., Carolyn House, Dingwall Road, Croydon, Surrey.

Index of Authors

Note. Short Communications are distinguished by C. Pages in *Proceedings of The Biochemical Society* are distinguished by P.

Index of Subjects

Note. Short Communications are distinguished by C. Pages in *Proceedings of The Biochemical Society* are distinguished by P.

2-Acetamido-1-(L-β-aspartamido)-1,2-dideoxy-β-D-glucose, isolation of, from glycopeptides derived from acidic glycoproteins of guinea-pig serum (Cunningham, W. L. & Simkin, J. L.) 434

Acetate, metabolism of, in *Escherichia coli* (Kornberg, H. L.) 1

Acetyl groups derived from glucose, fate of, in the isolated perfused goat udder (Hardwick, D. C.) 228

Acetylcholinesterase, inhibition of, by carbamates (Winteringham, F. P. W. & Fowler, K. S.) 6P

Acetylcholinesterase, inhibition of, by fluoride *in vitro* (Cimasoni, G.) 133

Acetyl-coenzyme A synthetase, activity of, in obesity (Spencer, A. F. & Lowenstein, J. M.) 760

N-Acetylglycine esters, α-chymotryptic hydrolysis of (Ingles, D. W. & Knowles, J. R.) 275

Actinomycin D, effect of, on the metabolism of ribonucleic acid by canine pancreas (Dickman, R. & Yang, J.) 56P

Actomyosin adenosine triphosphatase, 'natural' tropomyosin and the factor sensitizing, to ethylenedioxybis-(ethyleneamino)tetra-acetic acid (Perry, S. V., Davies, V. & Hayter, D.) 1C

Acyl-carrier protein, desaturation of acyl esters of, by *Euglena gracilis* (Gurr, M. I. & Bloch, K.) 16C

Acyl-coenzyme A cleavage enzymes, continuous polarographic assay of (Weitzman, P. D. J.) 18P

Adenosine diphosphate–adenosine triphosphate-exchange activity, separation of, from the cerebral microsomal sodium-plus-potassium ion-stimulated adenosine triphosphatase (Stahl, W. L., Sattin, A. & McIlwain, H.) 404

Adenosine diphosphate–adenosine triphosphate-exchange reaction of cerebral microsomes and its relation to the sodium ion-stimulated adenosine-triphosphatase reaction (Swanson, P. D. & Stahl, W. L.) 396

Adenosine diphosphate and related substances in plasma, detection and determination of (Ireland, D. M. & Mills, D. C. B.) 283

Adenosine phosphates, changes in the intracellular concentrations of, during the aerobic growth cycle of yeast, on different carbon sources (Polakis, E. S. & Bartley, W.) 521

Adenosine triphosphatase, actomyosin, 'natural' tropomyosin and the factor sensitizing, to ethylenedioxybis-(ethyleneamino)tetra-acetic acid (Perry, S. V., Davies, V. & Hayter, D.) 1C

Adenosine triphosphatase, cell-membrane, mode of inhibition by calcium of the activity of (Epstein, F. H. & Whittam, R.) 232

Adenosine triphosphatase, leucocyte-cell-membrane, lack of dependence on sodium and potassium ions of (Woodin, A. M. & Wieneke, A. A.) 493

Adenosine-triphosphatase reaction, sodium ion-stimulated, relation of adenosine diphosphate–adenosine triphosphate-exchange reaction of cerebral microsomes to (Swanson, P. D. & Stahl, W. L.) 396

Adenosine triphosphatase, sodium-plus-potassium ion-stimulated, separation of adenosine diphosphate–adenosine triphosphate-exchange activity of, in cerebral microsomes (Stahl, W. L., Sattin, A. & McIlwain, H.) 404

Adenosine 5′-triphosphate–arginine phosphotransferase, *see* Arginine kinase

Adenosine triphosphate–citrate oxaloacetate-lyase, activity of, in obesity and lactation (Spencer, A. F. & Lowenstein, J. M.) 760

Adenosine 5′-triphosphate–D-glucose 6-phosphotransferase, rat-liver, purification and properties of (Parry, M. J. & Walker, D. G.) 266

Adenosine, uptake of, in platelets and conversion into adenosine triphosphate (Ireland, D. M. & Mills, D. C. B.) 283

Adipose tissue, factors influencing the increase in the clearing-factor lipase activity produced on incubation of, from starved rats *in vitro* (Wing, D. R., Salaman, M. R. & Robinson, D. S.) 648

Adipose tissue, medium in which the clearing-factor lipase activity of, from starved rats increases *in vitro* (Salaman, M. R. & Robinson, D. S.) 640

Adrenal tissue, golden-hamster, oestrogen biosynthesis *in vitro* by (Lawrence, J. R. & Griffiths, K.) 27C

Aerobacter aerogenes, potassium metabolism in (Dicks, J. W. & Tempest, D. W.) 7P

L-Alanyl-β-naphthylamide, hydrolysis of, by human-tissue hydrolases (Panveliwalla, D. K. & Moss, D. W.) 501

Alcohol dehydrogenase, activity of, in the retina in the normal and dystrophic rat (Reading, H. W. & Sorsby, A.) 3C

Algae, blue–green, photoheterotrophism in (Carr, N. G. & Pearce, J.) 28P

Allulose phosphate, incorporation of C_1 units into, by extracts of *Pseudomonas methanica* (Kemp, M. B. & Quayle, J. R.) 41

Amino acid composition and terminal residues of aspartate aminotransferase from ox heart (Marino, G., Scardi, V. & Zito, R.) 595

Amino acid sequence around the reactive cysteine residues of glyceraldehyde 3-phosphate dehydrogenase (Perham, R. N.) 14C

Amino acid sequences, *N*- and *C*-terminal, of the heavy chain from a pathological human immunoglobulin IgG (Press, E. M., Piggot, P. J. & Porter, R. R.) 356

Amino acids, analysis of, by gas–liquid chromatography (Crichton, R. R. & Leaf, G.) 47P

Amino acids, biosynthesis of, by *Methanobacterium omelianskii* (Knight, M., Wolfe, R. S. & Elsden, S. R.) 76

Amino acids, effect of diabetes on the concentration of, in plasma and heart muscle of rats (Scharff, R. & Wool, I. G.) 173

Amino acids, improved analytical procedure for automatic analysis of (Thomas, A. J., Evans, R. A., Siriwardene, J. A. de S. & Robins, A. J.) 5C

Amino acids, incorporation of, by preparations from the developing rat brain (Adams, D. H. & Lim, L.) 261

Amino acids, incorporation of, into polypeptides in cell-free systems and the attachment of rapidly labelled ribonucleic acid to ribosomes (Wilkinson, B. R. & Kirby, K. S.) 786

α-Amino acids, method for the separation of peptides from (Tommel, D. K. J., Vliegenthart, J. F. G., Penders, T. J. & Arens, J. F.) 48P

Amino acids, oxidation by manganous ions and peroxidase of Schiff bases of pyridoxal and pyridoxal phosphate with (Hill, J. M. & Mann, P. J. G.) 454

Amino acids, role of, during osmotic adjustment in aquatic invertebrates (Chaplin, A. E., Huggins, A. K. & Munday, K. A.) 41P

Amino acids, simple data-processing system for use in analysis of (Robins, A. J., Evans, R. A., Siriwardene, J. A. de S. & Thomas, A. J.) 46P
Aminoacetone, formation of, from 1-aminopropan-2-ol catalysed by a dehydrogenase in *Escherichia coli* (Turner, J. M.) 427
Aminoacetone, microbial metabolism of (Higgins, I. J. & Turner, J. M.) 26P
Aminoacyl-β-naphthylamide hydrolases in extracts of human tissues, comparison of (Panveliwalla, D. K. & Moss, D. W.) 501
5-Aminolaevulate, microbial metabolism of (Pickard, M. A. & Turner, J. M.) 25P
δ-Aminolaevulate synthetase, 'permissive' effect of hydrocortisone on the induction of (Marver, H. S., Collins, A. & Tschudy, D. P.) 31C
α-Amino-β-oxobutyrate, metabolic fate of, in *Arthrobacter* sp. (McGilvray, D. & Morris, J. G.) 12P
o-Aminophenyl glucuronide, synthesis of, in several tissues of the domestic fowl during development (Dutton, G. J. & Ko, V.) 550
1-Aminopropan-2-ol, formation of aminoacetone from, catalysed by a dehydrogenase in *Escherichia coli* (Turner, J. M.) 427
1-Aminopropan-2-ol–nicotinamide–adenine dinucleotide oxidoreductases (Higgins, I. J., Pickard, M. A., Turner, J. M. & Willetts, A. J.) 27P
Amyrins, stereospecific biosynthesis of (Rees, H. H., Mercer, E. I. & Goodwin, T. W.) 726
Anaemia, hereditary, changes in blood components of mice with, cured by the injection of foetal liver cells from non-anaemic mice (Watts, R. L., Seller, M. J. & Polani, P. E.) 53P
8-Anilinonaphthalene-1-sulphonic acid, interactions of calf-thymus histone fractions in aqueous solution with (Laurence, D. J. R.) 419
Arginine kinase from lobster muscle, amino acid composition of (Virden, R. & Watts, D. C.) 159
Arginine kinase from lobster muscle, molecular weight of (Virden, R., Watts, D. C., Watts, R. L., Gammack, D. B. & Raper, J. H.) 155
Arginine kinase, role of thiol groups in the structure and mechanism of action of (Virden, R. & Watts, D. C.) 162
Arthrobacter globiformis, metabolism of glycine by (Jones, K. M. & Bridgeland, E. S.) 25P
Arthrobacter sp., metabolic fate of α-amino-β-oxobutyrate in (McGilvray, D. & Morris, J. G.) 12P
Arylsulphatases A and B and β-glucuronidase, gel filtration of, of rat-liver lysosomes (Wynn, C. H.) 36P
Ascites cells, Ehrlich, transport and metabolism of thiamine in (Menon, I. A. & Quastel, J. H.) 766
Ascites-hepatoma cells, Novikoff, Crabtree effect in (Nigam, V. N.) 413
Ascites-tumour cells, Landschütz, partial purification and general properties of deoxyribonucleic acid nucleotidyltransferase from (Shepherd, J. B. & Keir, H. M.) 443
Ascites-tumour cells, Landschütz, synthesis of polyribonucleotides by cytoplasmic enzymes of (Wykes, J. R. & Smellie, R. M. S.) 347
Aspalathin, chemistry of (Koeppen, B. H. & Roux, D. G.) 604
Aspartate aminotransferase, ox-heart, amino acid composition and terminal residues of (Marino, G., Scardi, V. & Zito, R.) 595
Aspartate aminotransferase, ox-heart, purification and general properties of (Marino, G., Greco, A. M., Scardi, V. & Zito, R.) 589
Aspergillus glaucus sp., growth of, on propionate (Richards, S. A. & Lloyd, D.) 56P
Aspergillus niger, a mercury-activated exopolygalacturonase from (Mill, P. J.) 557
Aspergillus niger, a second exopolygalacturonase from (Mill, P. J.) 562
Aspergillus niger, hydrolysis of barley and other β-glucans by β-(1→4)-glucan hydrolase of (Clarke, A. E. & Stone, B. A.) 582
Atria, guinea-pig, isolated, synthesis of noradrenaline by (Merrills, R. J. & Offerman, J.) 538
Azotobacter vinelandii, preparation of red and green electron-transport particles from (Jones, C. W. & Redfearn, E. R.) 33P
Azotobacter vinelandii, ubiquinone in the electron-transport system of (Knowles, C. J. & Redfearn, E. R.) 33P

Bacillus megaterium, preparation of polysomes from (Barker, G. R. & Pooley, H. M.) 30P
Bacillus stearothermophilus B65, glycerol teichoic acid from the cell wall of (Wicken, A. J.) 108
Bacillus subtilis, biosynthesis of bacilysin by (Roscoe, J. & Abraham, E. P.) 793
Bacilysin, biosynthesis of, by *Bacillus subtilis* (Roscoe, J. & Abraham, E. P.) 793
Bacteria, Gram-negative, distribution of 3-deoxy-2-oxo sugar acids in the cell walls of (Ellwood, D. C.) 55P
Bacteria, Gram-positive, glycosyl diglycerides in (Brundish, D. E., Shaw, N. & Baddiley, J.) 546
Bactoprenol, a lipid formed by lactobacilli from mevalonic acid, structure of (Thorne, K. J. I. & Kodicek, E.) 123
Barley glucan, enzymic hydrolysis of, by *Aspergillus niger* β-(1→4)-glucan hydrolase (Clarke, A. E. & Stone, B. A.) 582
Bence-Jones proteins, detection of (Hobbs, J. R.) 15P
Bile acids, naturally occurring, formation of, from cholesterol by rat-liver mitochondria *in vitro* (Mitropoulos, K. A. & Myant, N. B.) 51P
Bile, alligator, identification of coprochenodeoxycholic acid in (Dean, P. D. G. & Whitehouse, M. W.) 9P
Bile, cat, excretion of the glucuronide of thyroxine in (Myant, N. B.) 341
Bile, excretion of foreign compounds in, in different species (Abou-el-Makarem, M. M., Millburn, P., Smith, R. L. & Williams, R. T.) 3P
Bilirubin glucuronide, formation of, by rabbit liver (Tomlinson, G. A. & Yaffe, S. J.) 507
Biotin, effect of, on ornithine carbamoyltransferase synthesis in yeast (Dixon, B. & Rose, A. H.) 513
Blastocysts, behaviour of hypothalamic enzymes during the time of implantation of, in the rabbit (Hooper, K. C.) 128
Blood, changes in components of, of mice with a hereditary anaemia cured by the injection of foetal liver cells from non-anaemic mice (Watts, R. L., Seller, M. J. & Polani, P. E.) 53P
Blood, fowl, retinal in, in relation to sex and maturity (Plack, P. A., Miller, W. S. & Ward, C. M.) 71
Bone, metabolism of alkaline-earth elements in (Sansom, B. F. & Garner, R. J.) 677
Brain, rat, developing, amino acid incorporation by preparations from (Adams, D. H. & Lim, L.) 261
Brain, relation of adenosine diphosphate–adenosine triphosphate-exchange reaction to sodium ion-stimulated adenosine-triphosphatase reaction in microsomes of (Swanson, P. D. & Stahl, W. L.) 396
Brain, separation of adenosine diphosphate–adenosine triphosphate-exchange activity from the sodium-plus-potassium ion-stimulated adenosine triphosphatase in microsomes of (Stahl, W. L., Sattin, A. & McIlwain, H.) 404
Branching enzyme, liver, reaction catalysed by (Verhue, W. & Hers, H. G.) 222

Calcium, inhibition by chelation of intestinal absorption of, in conscious sheep (van't Klooster, A. Th. & Care, A. D.) 2P

Calcium, metabolism of, compared with that of radium in dairy cows (Sansom, B. F. & Garner, R. J.) 677
Calcium, mode of inhibition of cell-membrane adenosine-triphosphatase activity by (Epstein, F. H. & Whittam, R.) 232
Carbamates, inhibition of acetylcholinesterase by (Winteringham, F. P. W. & Fowler, K. S.) 6P
Carbohydrate–polypeptide bonds in acidic glycoproteins of guinea-pig serum (Cunningham, W. L. & Simkin, J. L.) 434
Carbon dioxide and mevalonic acid, incorporation of, into terpenoids of higher plants during chloroplast development (Treharne, K. J., Mercer, E. I. & Goodwin, T. W.) 239
Carbon dioxide, utilization of, for the biosynthesis of amino acids by *Methanobacterium omelianskii* (Knight, M., Wolfe, R. S. & Elsden, S. R.) 76
Carboxylic acids, fluorine-containing, use of, for the large-scale isolation of highly polymerized deoxyribonucleic acids (Jones, A. S. & Walker, R. T.) 49
Carnitine acetyltransferase, kinetic studies on the mechanism of action of (Chase, J. F. A. & Tubbs, P. K.) 32
β-Carotene, metabolism and biological potency of the 5,6-monoepoxy and 5,6:5′,6′-diepoxy derivatives of (Subbarayan, C., Lakshmanan, M. R. & Cama, H. R.) 308
Catecholamines, column chromatography of (Merrills, R. J. & Offerman, J.) 538
Cell-membrane fraction from the polymorphonuclear leucocyte, composition and properties of (Woodin, A. M. & Wieneke, A. A.) 493
Cell membrane, mode of inhibition by calcium of the adenosine-triphosphatase activity of (Epstein, F. H. & Whittam, R.) 232
Cell membrane of the polymorphonuclear leucocyte, interaction of leucocidin with (Woodin, A. M. & Wieneke, A. A.) 479
Cell wall of *Bacillus stearothermophilus* B65, glycerol teichoic acid from (Wicken, A. J.) 108
Cells, ascites, Ehrlich, transport and metabolism of thiamine in (Menon, I. A. & Quastel, J. H.) 766
Cells, parenchymal, rat-liver, uptake of homologous ribonucleic acid by suspensions of (Shanmugam, G. & Bhargava, P. M.) 297
Cells, plant, intracellular localization of mevalonate-activating enzymes in (Rogers, L. J., Shah, S. P. J. & Goodwin, T. W.) 381
Cells, rat-liver, uptake of lipids by (Higgins, J. A. & Green, C.) 631
Cellulases of a marine mollusc, *Dolabella* sp. (Okada, G., Nisizawa, T. & Nisizawa, K.) 214
Chalcone, identification of aspalathin as *C*-glucosyldihydro derivative of (Koeppen, B. H. & Roux, D. G.) 604
Chick, synthesis of *o*-aminophenyl glucuronide in several tissues of, during development (Dutton, G. J. & Ko, V.) 550
Chloramphenicol, effect of, on the biosynthesis of bacilysin (Roscoe, J. & Abraham, E. P.) 793
p-Chloromercuribenzoate, mechanism of the dissociation of haemoglobin by (Rosemeyer, M. A. & Huehns, E. R.) 50P
Chloroplasts, incorporation of carbon dioxide and mevalonic acid into terpenoids of higher plants during development of (Treharne, K. J., Mercer, E. I. & Goodwin, T. W.) 239
Cholesterol, effects of starvation and re-feeding on synthesis of (Jansen, G. R., Zanetti, M. E. & Hutchison, C. F.) 333
Cholesterol, side-chain cleavage of, by bovine adrenal-cortical mitochondria (Simpson, E. R. & Boyd, G. S.) 52P
Cholinesterases, inhibition of, by fluoride *in vitro* (Cimasoni, G.) 133
Chondroitin sulphate, interactions of, with proteins in a two-phase system containing phenol and aqueous buffers at various pH values (Pusztai, A.) 93
Chromatography, column, automatic sample loader for (Eveleigh, J. W. & Thomson, A. R.) 49P
Chromatography, multi-channel programming valve for use in (Eveleigh, J. W. & Thomson, A. R.) 49P
Chylomicrons, uptake of, by rat liver cells (Higgins, J. A. & Green, C.) 631
α-Chymotrypsin, hydrolysis of glycine esters by (Ingles, D. W. & Knowles, J. R.) 275
Cinnabarinate synthase, rat-liver, partial purification and properties of (Subba Rao, P. V. & Vaidyanathan, C. S.) 317
Cinnabarinic acid, enzymic conversion of 3-hydroxyanthranilic acid into (Subba Rao, P. V. & Vaidyanathan, C. S.) 317
Citrate-cleavage enzyme, activity of, in obesity and lactation (Spencer, A. F. & Lowenstein, J. M.) 760
Clearing-factor lipase, factors influencing the increase in activity of, produced on incubation of adipose tissue from starved rats *in vitro* (Wing, D. R., Salaman, M. R. & Robinson, D. S.) 648
Clearing-factor lipase, medium in which the activity of, of adipose tissue from starved rats increases *in vitro* (Salaman, M. R. & Robinson, D. S.) 640
Cobalamin derivatives and C_1 transfer in methane formation (Wolfe, R. S.) 22P
Collagen, new applications of differential thermal analysis with particular reference to, and the human intervertebral disk (Dickson I. R.) 46P
Colworth Medal Lecture, the First (Kornberg, H. L.) 1
Coprochenodeoxycholic acid, identification of, in alligator bile (Dean P. D. G. & Whitehouse, M. W.) 9P
Crabtree effect in Novikoff ascites-hepatoma cells (Nigam, V. N.) 413
Creatine kinase, modified, from dystrophic mouse skeletal muscle (Hooton, B. T. & Watts, D. C.) 53P
Crocin, effect of phenolic compounds and peroxidase on oxidation of, by sugar-beet leaf mitochondria (Dicks, J. W. & Friend, J.) 38P
Crocin, oxidation of, by Triton extracts of sugar-beet leaf mitochondria (Dicks, J. W. & Friend, J.) 38P
α-Crystallin, formation and properties of sub-units of (Wisse, J. H., Zweers, A., Jongkind, F. J., Bont, W. S. & Bloemendal, H.) 179
Cycloheximide, effect of, on ribonucleic acid synthesis in *Saccharomyces carlsbergensis* (de Kloet, S. R.) 566
Cysteine/cystine ratio, intracellular, in kidney cortex (Crawhall, J. C. & Segal, S.) 19C
Cysteine residues, reactive, amino acid sequence around, of glyceraldehyde 3-phosphate dehydrogenase (Perham, R. N.) 14C
Cytochrome system and reduced nicotinamide–adenine dinucleotide in mammalian and yeast respiratory-chain preparations, electron transfer between (Tyler, D. D. & Gonze, J.) 10P

3-Dehydrovitamin A, absorption, storage and distribution of, in the rat (John, K. V., Lakshmanan, M. R. & Cama, H. R.) 312
3-Deoxy-2-oxo sugar acids, distribution of, in the cell walls of Gram-negative bacteria (Ellwood, D. C.) 55P
Deoxyribonucleic acid, homologous, hybridization of ribonucleic acid synthesized by isolated rat-liver nuclei with (Blackburn, K. J. & Klemperer, H. G.) 54P
Deoxyribonucleic acid nucleotidyltransferase from Landschütz ascites-tumour cells, partial purification and general properties of (Shepherd, J. B. & Keir, H. M.) 443
Deoxyribonucleic acids, highly polymerized, use of fluorine-containing carboxylic acids for the large-scale isolation of (Jones, A. S. & Walker, R. T.) 49

Deoxyribonucleic acids, interactions of, with proteins in a two-phase system containing phenol and aqueous buffers at various pH values (Pusztai, A.) 93
Depsidase and esterase activities of tannase (Haslam, E. & Stangroom, J. E.) 28
Deuterium oxide and the detection of water-binding (Lewin, S.) 1P
Diabetes, effect of, on the concentration of amino acids in plasma and heart muscle of rats (Scharff, R. & Wool, I. G.) 173
Di-(3,5-di-*tert.*-butyl-4-hydroxyphenyl)methane (Ionox 220), fate of, in the rat (Wright, A. S., Crowne, R. S. & Hathway, D. E.) 146
5,6:5′,6′-Diepoxy-β-carotene and 5,6-monoepoxy-β-carotene, metabolism and biological potency of (Subbarayan, C., Lakshmanan, M. R. & Cama, H. R.) 308
Diet, effect of, on carbon and energy loss in urine and faeces of man and the mouse (Pawan, G. L. S.) 4P
Diet, effect of, on the composition of the kidney (Thomson, R. Y. & Halliburton, I. W.) 44P
Dihydrochalcone, identification of aspalathin as *C*-glucosyl derivative of (Koeppen, B. H. & Roux, D. G.) 604
2,3-Dihydroxybenzoic acid, bacterial oxidation of, by a new oxygenase (Ribbons, D. W.) 30P
3α,7α-Dihydroxy-5β-cholestanoic acid, *see* Coprochenodeoxycholic acid
4-Dimethylamino-3′-methylazobenzene, effect of treatment with, on the activity of enzymes of the pentose phosphate pathway in rat liver (McLean, P.) 776
3,5-Dinitro-*o*-cresol, metabolism of, by soil micro-organisms (Tewfik, M. S. & Evans, W. C.) 31P
1,4-Dithiothreitol as a reagent for the reductive degradation of human γG-globulin (Gunewardena, P. & Cooke, K. B.) 8P
Dolabella sp. (marine mollusc), cellulases of (Okada, G., Nisizawa, T. & Nisizawa, K.) 214
Drosophila melanogaster, isolation of nucleic acids from (Hastings, J. R. B. & Kirby, K. S.) 19P
Dyes, cationic, new classification of, based on their affinity for ionized groups of polyanions (Scott, J. E.) 3P

Ehrlich ascites cells, transport and metabolism of thiamine in (Menon, I. A. & Quastel, J. H.) 766
Enzymes, release of, from lysosomes as a result of irradiation (Wills, E. D. & Wilkinson, A. E.) 657
Erabutoxins a and b, crystallization of, from *Laticauda semifasciata* venom (Tamiya, N. & Arai, H.) 624
Escherichia coli, aminoacetone formation from 1-aminopropan-2-ol by a dehydrogenase in (Turner, J. M.) 427
Escherichia coli, biogenesis of C_1 units in (Crosbie, G. W.) 21P
Escherichia coli, C_1 unit biogenesis in (Cheeseman, P. & Crosbie, G. W.) 24P
Escherichia coli, chemical and biological properties of an extracellular lipopolysaccharide from, grown under lysine-limiting conditions (Taylor, A., Knox, K. W. & Work, E.) 53
Escherichia coli, role and control of the glyoxylate cycle in (Kornberg, H. L.) 1
Esterase and depsidase activities of tannase (Haslam, E. & Stangroom, J. E.) 28
Ethanol, utilization of, for the biosynthesis of amino acids by *Methanobacterium omelianskii* (Knight, M., Wolfe, R. S. & Elsden, S. R.) 76
Ethionine, effect of treatment with, on the activity of enzymes concerned with urea synthesis and the pentose phosphate pathway in rat liver (McLean, P.) 776
Ethylene glycol bis(aminoethyl)-*NN′N′*-tetra-acetic acid, *see* Ethylenedioxybis(ethyleneamino)tetra-acetic acid
Ethylenedioxybis(ethyleneamino)tetra-acetic acid, 'natural' tropomyosin and the factor sensitizing actomyosin adenosine triphosphatase to (Perry, S. V., Davies, V. & Hayter, D.) 1C
N-Ethylmaleimide, modification of the cytotoxic effect of leucocidin on leucocytes by (Woodin, A. M. & Wieneke, A. A.) 469
17α-Ethynyl steroids, metabolism of (Fotherby, K., Kamyab, S., Littleton, P. & Klopper, A.) 14P
Euglena gracilis, hydroxy fatty acid dehydrogenase in (Gurr, M. I. & Bloch, K.) 16C
Exopolygalacturonase, a second, from *Aspergillus niger* (Mill, P. J.) 562
Exopolygalacturonase, mercury-activated, from *Aspergillus niger* (Mill, P. J.) 557

Fat, dietary, effect of, on conversion of glucose into fat and turnover of newly synthesized fat (Jansen, G. R., Hutchison, C. F. & Zanetti, M. E.) 323
Fat, dietary, effect of, on ileostomy fluid fatty acids (Wiggins, H. S., Howell, K. E., Kellock, T. D. & Stalder, G.) 17P
Fatty acids, effect of dietary fat or starvation on synthesis of, from glucose (Jansen, G. R., Hutchison, C. F. & Zanetti, M. E.) 323
Fatty acids, effect of starvation and re-feeding on synthesis of (Jansen, G. R., Zanetti, M. E. & Hutchison, C. F.) 333
Fatty acids, essential, proportions of different lecithins in the livers of rats deficient in (Collins, F. D.) 117
Fatty acids, synthesis of, in obesity and lactation, activity of citrate-cleavage enzyme and (Spencer, A. F. & Lowenstein, J. M.) 760
Fatty acids, uptake of, by rat liver cells (Higgins, J. A. & Green, C.) 631
Ferritin, horse, dimers, trimers and higher polymers in (Williams, M. A., Gregory, D. W. & Harrison, P. M.) 10P
Flavine mononucleotide, modification of the cytotoxic effect of leucocidin on leucocytes by (Woodin, A. M. & Wieneke, A. A.) 469
Fluoride, inhibition of cholinesterases by, *in vitro* (Cimasoni, G.) 133
Fluorine-containing carboxylic acids, use of, for the large-scale isolation of highly polymerized deoxyribonucleic acids (Jones, A. S. & Walker, R. T.) 49
Folate, role of, in the metabolism of *Pseudomonas* AM1 (Hollinshead, J. A.) 389
Folic acid, sulphonamides and the microbial synthesis of (Hutchinson, R. M.) 23P
Formaldehyde, incorporation of, into allulose phosphate by extracts of *Pseudomonas methanica* (Kemp, M. B. & Quayle, J. R.) 41
2-Formamido-1-naphthyl hydrogen sulphate as a metabolite of 2-naphthylamine in dogs and rats (Boyland, E. & Manson, D.) 189
Fowl (*Gallus gallus*), synthesis of *o*-aminophenyl glucuronide in several tissues of, during development (Dutton, G. J. & Ko, V.) 550
Fowl, retinal in the blood and liver of, in relation to sex and maturity (Plack, P. A., Miller, W. S. & Ward, C. M.) 71
Fructose 1,6-diphosphatase in bovine lactating mammary gland (Baird, G. D.) 43P
Fructose 1,6-diphosphatase, metabolic regulation of, in kidney cortex (Newsholme, E. A. & Underwood, A.H.) 24C

Galactose, utilization of, during the aerobic growth cycle of yeast (Polakis, E. S. & Bartley, W.) 521
Globulin (γG), human, 1,4-dithiothreitol as a reagent for the reductive deamination of (Gunewardena, P. & Cooke, K. B.) 8P
β-(1→4)-Glucan hydrolase, *Aspergillus niger*, enzymic hydrolysis of barley and other β-glucans by (Clarke, A. E. & Stone, B. A.) 582

D-Glucaro-(1→4)-(6→3)-dilactone, enzymic production of, from D-glucuronolactone (Marsh, C. A.) 22
D-Glucaro-(1→4)-lactone, formation of, from D-glucarodilactone (Marsh, C. A.) 22
Glucokinase, rat-liver, purification and properties of (Parry, M. J. & Walker, D. G.) 266
Glucose carbon atoms, effects of insulin-induced hypoglycaemia on the fate of, in the mouse (Vrba, R.) 367
Glucose, effect of dietary fat or starvation on conversion of, into fat (Jansen, G. R., Hutchison, C. F. & Zanetti, M. E.) 323
Glucose, fate of acetyl groups derived from, in the isolated perfused goat udder (Hardwick, D. C.) 228
Glucose, participation of, in the increase in the clearing-factor lipase activity of adipose tissue from starved rats produced on incubation of the tissue *in vitro* (Salaman, M. R. & Robinson, D. S.) 640
Glucose 6-phosphate dehydrogenase, effects of ethionine and azo-dye treatments on the activity of, in rat liver (McLean, P.) 776
Glucose, utilization of, during the aerobic growth cycle of yeast (Polakis, E. S. & Bartley, W.) 521
Glucosiduronates and sulphates of 17-oxo steroids in human urine, indirect analysis of (Menini, E.) 747
α-D-Glucosyl fluoride, hydrolysis of, by rat intestinal mucosa (Barnett, J. E. G., Jarvis, W. T. S. & Munday, K. A.) 41P
β-Glucuronidase and arylsulphatases A and B, gel filtration of, of rat-liver lysosomes (Wynn, C. H.) 36P
Glucuronides of bilirubin and *p*-nitrophenol, formation of, by rabbit liver (Tomlinson, G. A. & Yaffe, S. J.) 507
Glucuronides of thyroxine and 3,3′,5′-tri-iodothyronine, excretion of, in cat bile (Myant, N. B.) 341
D-Glucuronolactone dehydrogenase, inhibitory properties of the products of the action of (Marsh, C. A.) 22
Glutamate dehydrogenase, hybridization *in vitro* between wild-type and mutant forms of, from *Neurospora crassa* (Coddington, A.) 9C
Glutamate, enzymic estimation of (Sowerby, J. M. & Ottaway, J. H.) 246
L-Glutamate, specific requirement for sodium chloride for the active uptake of, by *Halobacterium salinarium* (Stevenson, J.) 257
Glutamine, enzymic estimation of (Sowerby, J. M. & Ottaway, J. H.) 246
Glutathione, an enzyme catalysing the reaction of unsaturated compounds with (Boyland, E. & Chasseaud, L. F.) 13P
Glyceraldehyde 3-phosphate dehydrogenase, extended amino acid sequence around the reactive cysteine residues of (Perham, R. N.) 14C
Glycerol teichoic acid from the cell wall of *Bacillus stearothermophilus* B65 (Wicken, A. J.) 108
α-Glycerophosphate cycle, components of, and their relation to oxidative metabolism in the lens (Griffiths, M. H.) 12
Glycine esters, α-chymotryptic hydrolysis of (Ingles, D. W. & Knowles, J. R.) 275
Glycine, formation of, from glyoxylate in *Micrococcus denitrificans* (Gibbs, R. G. & Morris, J. G.) 27P
Glycine, metabolism of, by *Arthrobacter globiformis* (Jones, K. M. & Bridgeland, E. S.) 25P
Glycogen, metabolism of, *in vivo* in heart muscle of fed and starved rats (Jedeikin, L. A.) 6P
Glycolipids, presence of glycosyl diglycerides in, of Gram-positive bacteria (Brundish, D. E., Shaw, N. & Baddiley, J.) 546
Glycopeptides derived from acidic glycoproteins of guinea-pig serum (Cunningham, W. L. & Simkin, J. L.) 434
Glycoproteins, acidic, glycopeptides derived from, of guinea-pig serum (Cunningham, W. L. & Simkin, J. L.) 434
Glycoproteins, plasma, stimulation of synthesis of, by a factor in rat blood (Gordon, A. H.) 32P
Glycosaminopeptide–teichoic acid linkage in the walls of a strain of *Staphylococcus lactis* (Button, D., Archibald, A. R. & Baddiley, J.) 11C
Glycosulphatase, *Patella vulgata*, acidimetric assay of, acting on some monosaccharide sulphates, by using a pH-stat (Lloyd, P. F. & Stuart, C. H.) 37P
Glycosyl diglycerides in Gram-positive bacteria (Brundish, D. E., Shaw, N. & Baddiley, J.) 546
Glyoxylate cycle, role and control of, in *Escherichia coli* (Kornberg, H. L.) 1
Glyoxylate, formation of glycine from, in *Micrococcus denitrificans* (Gibbs, R. G. & Morris, J. G.) 27P
Goitre, failure of iodine deficiency alone to produce (Dimitriadou, A., Ekpechi, O. L., Gadhok, R. & Fraser, T. R.) 16P

Haemoglobin, mechanism of the dissociation of, by *p*-chloromercuribenzoate (Rosemeyer, M. A. & Huehns, E. R.) 50P
Haemoglobin tetramers, sheep, stability of (Kernohan, J. C. & Johnson, P.) 37P
Halobacterium salinarium, specific requirement for sodium chloride for the active uptake of L-glutamate by (Stevenson, J.) 257
Heart, ox, amino acid composition and terminal residues of aspartate aminotransferase from (Marino, G., Scardi, V. & Zito, R.) 595
Heart, ox, purification and general properties of aspartate aminotransferase from (Marino, G., Greco, A. M., Scardi, V. & Zito, R.) 589
Heparin, participation of, in the increase in the clearing-factor lipase activity of adipose tissue from starved rats produced on incubation of the tissue *in vitro* (Salaman, M. R. & Robinson, D. S.) 640
Hepatoma, rat, rapidly labelled ribonucleic acid in (Wilkinson, B. R. & Kirby, K. S.) 780
Histamine, effect of anti-inflammatory acids on the formation of, *in vitro* (Skidmore, I. F. & Whitehouse, M. W.) 5P
Histone fractions, calf-thymus, interactions of, in aqueous solution with 8-anilinonaphthalene-1-sulphonic acid (Laurence, D. J. R.) 419
Histones, leucocyte, human, labelling of, with [^{14}C]lysine (MacGillivray, A. J., Monjardino, J. P. P. Y. & Moss, G. E.) 41P
Homobiotin, effect of, on ornithine carbamoyltransferase synthesis in yeast (Dixon, B. & Rose, A. H.) 513
Hydrocortisone, 'permissive' effect of, on the induction of δ-aminolaevulate synthetase (Marver, H. S., Collins, A. & Tschudy, D. P.) 31C
Hydroxy fatty acid dehydrogenase in *Euglena gracilis* (Gurr, M. I. & Bloch, K.) 16C
3-Hydroxyanthranilic acid, enzymic conversion of, into cinnabarinic acid (Subba Rao, P. V. & Vaidyanathan, C. S.) 317
26-Hydroxycholesterol and squalene in the human atheromatous plaque (Steel, G., Brooks, C. J. W. & Harland, W. A.) 51P
2-Hydroxyindan-1-one, metabolism of, in rats (Lewis, D. A.) 694
Hypoglycaemia, insulin-induced, effects of, on the fate of glucose carbon atoms in the mouse (Vrba, R.) 367
Hypothalamus, behaviour of the enzymes of, during the time of blastocyst implantation in the rabbit (Hooper, K. C.) 128

Ileostomy fluid, influence of dietary fat on the fatty acids of (Wiggins, H. S., Howell, K. E., Kellock, T. D. & Stalder, G.) 17P
Immunoglobulin G, human, normal, *C*-terminal peptide of the heavy chain of (Piggot, P. J. & Press, E. M.) 16P

Immunoglobulin IgG, *N*- and *C*-terminal amino acid sequences of the heavy chain from (Press, E. M., Piggot, P. J. & Porter, R. R.) 356
cis- and *trans*-Indane-1,2-diol, metabolism of, in rats (Lewis, D. A.) 694
Indene epoxide, conversion of, into *cis*- and *trans*-indane-1,2-diol in rats (Lewis, D. A.) 694
Indicator yellow analogues and visual pigment formed from 5,6-monoepoxyretinal (Lakshmanan, M. R. & Cama, H. R.) 87
Inhibitors, metabolic, effect of, on the development of respiration in anaerobically grown yeast (Bartley, W. & Tustanoff, E. R.) 599
Inositol, microbiological determination of, in rat-liver monophosphoinositide (Long, C. & Owens, K.) 617
Insulin, effects of hypoglycaemia induced by, on the fate of glucose carbon atoms in the mouse (Vrba, R.) 367
Insulin, participation of, in the increase in the clearing-factor lipase activity of adipose tissue from starved rats produced on incubation of the tissue *in vitro* (Salaman, M. R. & Robinson, D. S.) 640
Insulin, stimulation of the formation of ribonucleic acid and protein by mammary tissues *in vitro* by (Mayne, R., Barry, J. M. & Rivera, E. M.) 688
Ionox 220 [di-(3,5-di-*tert*.-butyl-4-hydroxyphenyl)-methane], fate of, in the rat (Wright, A. S., Crowne, R. S. & Hathway, D. E.) 146
Iron, relation of, to mechanisms of lipid peroxide formation in animal tissues (Wills, E. D.) 667
Isoamylases in the human (Aw, S. E. & Hobbs, J. R.) 16P

Kidney cortex, control of glycolysis and gluconeogenesis in (Newsholme, E. A. & Underwood, A. H.) 24C
Kidney cortex, intracellular cysteine/cystine ratio in (Crawhall, J. C. & Segal, S.) 19C
Kidney, early chemical changes in compensatory hypertrophy of (Halliburton, I. W. & Thomson, R. Y.) 44P
Kidney, effect of diet on the composition of (Thomson, R. Y. & Halliburton, I. W.) 44P
Kidney, preferential accumulation of mercury by (Clarkson, T. W. & Magos, L.) 62

Lactobacillus spp., formation of the lipid bactoprenol by, from mevalonic acid (Thorne, K. J. I. & Kodicek, E.) 123
Landschütz ascites-tumour cells, partial purification and general properties of deoxyribonucleic acid nucleotidyltransferase from (Shepherd, J. B. & Keir, H. M.) 443
Landschütz ascites-tumour cells, synthesis of polyribonucleotides by cytoplasmic enzymes of (Wykes, J. R. & Smellie, R. M. S.) 347
Laticauda semifasciata, crystallization of erabutoxins a and b from venom of (Tamiya, N. & Arai, H.) 624
Lecithins, different, proportions of, in the livers of rats deficient in essential fatty acids (Collins, F. D.) 117
Lens, components of an α-glycerophosphate cycle and their relation to oxidative metabolism in (Griffiths, M. H.) 12
L-[U-^{14}C]Leucine, inhibitory effect of salicylate on the incorporation of, into the protein of rat tissue preparations *in vitro* (Dawkins, P. D., Gould, B. J. & Smith, M. J. H.) 703
Leucocidin, interaction of, with the cell membrane of the polymorphonuclear leucocyte (Woodin, A. M. & Wieneke, A. A.) 479
Leucocidin, modification of the cytotoxic effect on leucocytes of, by *N*-ethylmaleimide, flavine mononucleotide and menadione (Woodin, A. M. & Wieneke, A. A.) 469
Leucocytes, modification of the cytotoxic effect of leucocidin on, by *N*-ethylmaleimide, flavine mononucleotide and menadione (Woodin, A. M. & Wieneke, A. A.) 469
Leucocytes, polymorphonuclear, composition and properties of a cell-membrane fraction from (Woodin, A. M. & Wieneke, A. A.) 493
Leucocytes, polymorphonuclear, interaction of leucocidin with the cell membrane of (Woodin, A. M. & Wieneke, A. A.) 479
L-Leucyl-β-naphthylamide, hydrolysis of, by human-tissue hydrolases (Panveliwalla, D. K. & Moss, D. W.) 501
Lichenin, enzymic hydrolysis of, by *Aspergillus niger* β-(1→4)-glucan hydrolase (Clarke, A. E. & Stone, B. A.) 582
Lipase, clearing-factor, factors influencing the increase in activity of, produced on incubation of adipose tissue from starved rats *in vitro* (Wing, D. R., Salaman, M. R. & Robinson, D. S.) 648
Lipase, clearing-factor, medium in which the activity of, of adipose tissue from starved rats increases *in vitro* (Salaman, M. R. & Robinson, D. S.) 640
Lipid peroxides, formation of, in lysosomes as a result of irradiation (Wills, E. D. & Wilkinson, A. E.) 657
Lipid peroxides, mechanisms of formation of, in animal tissues (Wills, E. D.) 667
Lipids, uptake of, by rat liver cells (Higgins, J. A. & Green, C.) 631
Lipogenesis, effect of dietary fat or starvation on (Jansen, G. R., Hutchison, C. F. & Zanetti, M. E.) 323
Lipogenesis, effect of starvation and re-feeding on (Jansen, G. R., Zanetti, M. E. & Hutchison, C. F.) 333
Lipopolysaccharide, extracellular, chemical and biological properties of, from *Escherichia coli* grown under lysine-limiting conditions (Taylor, A., Knox, K. W. & Work, E.) 53
Lipoprotein lipase, demonstration of, in rat liver (Mayes, P. A. & Felts, J. M.) 43P
Lipoprotein lipase, *see also* Clearing-factor lipase
Liver, cat, probable presence of uridine diphosphate glucuronic acid glucuronyltransferase in (Myant, N. B.) 341
Liver cells, rat, uptake of lipids by (Higgins, J. A. & Green, C.) 631
Liver, fowl, retinal in, in relation to sex and maturity (Plack, P. A., Miller, W. S. & Ward, C. M.) 71
Liver, proportions of different lecithins in, of rats deficient in essential fatty acids (Collins, F. D.) 117
Liver, rabbit, formation of bilirubin and *p*-nitrophenyl glucuronides by (Tomlinson, G. A. & Yaffe, S. J.) 507
Liver, rat, attachment of rapidly labelled ribonucleic acid of, to ribosomes and stimulation of the incorporation of amino acids into polypeptides in cell-free systems (Wilkinson, B. R. & Kirby, K. S.) 786
Liver, rat, chromatographic behaviour of monophosphoinositide from (Long, C. & Owens, K.) 617
Liver, rat, effect of ethionine treatment on the activity of enzymes concerned with urea synthesis in (McLean, P.) 776
Liver, rat, morphological origin and function of polysomes isolated from (Campbell, P. N., Lowe, E. & Sharp, M. D. B.) 22C
Liver, rat, purification and properties of glucokinase from (Parry, M. J. & Walker, D. G.) 266
Liver, rat, rapidly labelled ribonucleic acid in cell fractions of (Wilkinson, B. R. & Kirby, K. S.) 780
Liver, rat, release of enzymes from lysosomes of, by irradiation and the relation of lipid peroxide formation to enzyme release (Wills, E. D. & Wilkinson, A. E.) 657
Liver, rat, uptake of homologous ribonucleic acid by parenchymal cells of (Shanmugam, G. & Bhargava, P. M.) 297
Liver, reaction catalysed by the branching enzyme of (Verhue, W. & Hers, H. G.) 222
Lobster, amino acid composition of arginine kinase from the muscle of (Virden, R. & Watts, D. C.) 159
Lobster, molecular weight of arginine kinase from the muscle of (Virden, R., Watts, D. C., Watts, R. L., Gammack, D. B. & Raper, J. H.) 155

Lysine, chemical and biological properties of an extracellular lipopolysaccharide from *Escherichia coli* grown with limiting amounts of (Taylor, A., Knox, K. W. & Work, E.) 53
[^{14}C]Lysine, labelling of human leucocyte histones with (MacGillivray, A. J., Monjardino, J. P. P. Y. & Moss, G. E.) 41P
Lysosomes, rat-liver, gel filtration of β-glucuronidase and arylsulphatases A and B of (Wynn, C. H.) 36P
Lysosomes, release of enzymes from, by irradiation and the relation of lipid peroxide formation to enzyme release (Wills, E. D. & Wilkinson, A. E.) 657

Magnesium, effects of deficiency of, in Gram-positive and Gram-negative bacteria (Webb, M.) 24P
Mammary gland, stimulation by insulin of the formation of ribonucleic acid and protein *in vitro* by (Mayne, R., Barry, J. M. & Rivera, E. M.) 688
Manganous ions and peroxidase, oxidation of Schiff bases of pyridoxal and pyridoxal phosphate with amino acids by (Hill, J. M. & Mann, P. J. G.) 454
Membrane, cell, mode of inhibition by calcium of the adenosine-triphosphatase activity of (Epstein, F. H. & Whittam, R.) 232
Menadione, modification of the cytotoxic effect of leucocidin on leucocytes by (Woodin, A. M. & Wieneke, A. A.) 469
Mercury, binding of, in tissue homogenates (Clarkson, T. W. & Magos, L.) 62
Methane, cobalamin derivatives and C_1 transfer in formation of (Wolfe, R. S.) 22P
Methane, microbial growth on (Quayle, J. R.) 22P
Methanobacterium omelianskii, biosynthesis of amino acids by (Knight, M., Wolfe, R. S. & Elsden, S. R.) 76
Methanol, role of folate in the metabolism of *Pseudomonas* AM1 grown on (Hollinshead, J. A.) 389
[*Me*-^{14}C]Methionine, incorporation of, into phytosterols (Goad, L. J. & Goodwin, T. W.) 735
Methyl, methylene and methenyl groups (C_1 units), activation and transfer of (Jaenicke, L.) 21P
Mevalonate-activating enzymes, intracellular localization of, in plant cells (Rogers, L. J., Shah, S. P. J. & Goodwin, T. W.) 381
[2-^{14}C]Mevalonate, incorporation of, into phytosterols (Goad, L. J. & Goodwin, T. W.) 735
[2-^{14}C, 4*R*-^{3}H]Mevalonate, incorporation of, into plant triterpenoids (Rees, H. H., Mercer, E. I. & Goodwin, T. W.) 726
Mevalonate kinase, intracellular localization of, in plant cells (Rogers, L. J., Shah, S. P. J. & Goodwin, T. W.) 381
Mevalonic acid and carbon dioxide, incorporation of, into terpenoids of higher plants during chloroplast development (Treharne, K. J., Mercer, E. I. & Goodwin, T. W.) 239
Mevalonic acid, formation of the lipid bactoprenol from, by lactobacilli (Thorne, K. J. I. & Kodicek, E.) 123
Micrococcus denitrificans, formation of glycine from glyoxylate in (Gibbs, R. G. & Morris, J. G.) 27P
Microsomes, ascites-tumour-cell, synthesis of polyribonucleotides by (Wykes, J. R. & Smellie, R. M. S.) 347
Microsomes, cerebral, adenosine diphosphate–adenosine triphosphate-exchange reaction of, and relation to the sodium ion-stimulated adenosine-triphosphatase reaction (Swanson, P. D. & Stahl, W. L.) 396
Microsomes, cerebral, separation of adenosine diphosphate–adenosine triphosphate-exchange activity from the sodium-plus-potassium ion-stimulated adenosine triphosphatase of (Stahl, W. L., Sattin, A. & McIlwain, H.) 404
Microsomes, human-prostate, catabolism of [4-^{14}C]testosterone by (Chamberlain, J., Jagarinec, N. & Ofner, P.) 610
Microsomes, rat-liver, incorporation of nucleotides into ribonucleic acid by extracts from (Page, M. G. & Klemperer, H. G.) 54P
Mitochondria, adrenal-cortical, bovine, side-chain cleavage of cholesterol by (Simpson, E. R. & Boyd, G. S.) 52P
Mitochondria, human-prostate, catabolism of [4-^{14}C]testosterone by (Chamberlain, J., Jagarinec, N. & Ofner, P.) 610
Mitochondria, induced and spontaneous movements of potassium ions into (Harris, E. J., Cockrell, R. & Pressman, B. C.) 200
Mitochondria, rat-liver, formation of naturally occurring bile acids from cholesterol *in vitro* by (Mitropoulos, K. A. & Myant, N. B.) 51P
Mitochondria, sugar-beet leaf, crocin oxidation by Triton extracts of (Dicks, J. W. & Friend, J.) 38P
Mitochondria, sugar-beet leaf, effect of phenolic compounds and peroxidase on crocin oxidation by (Dicks, J. W. & Friend, J.) 38P
Mollusc (*Dolabella* sp.), marine, cellulases of (Okada, G., Nisizawa, T. & Nisizawa, K.) 214
5,6-Monoepoxy-β-carotene and 5,6:5′,6′-diepoxy-β-carotene, metabolism and biological potency of (Subbarayan, C., Lakshmanan, M. R. & Cama, H. R.) 308
5,6-Monoepoxyretinal, visual pigment and the indicator yellow analogues formed from (Lakshmanan, M. R. & Cama, H. R.) 87
Monophosphoinositide, rat-liver, chromatographic behaviour of (Long, C. & Owens, K.) 617
Mucopolysaccharide–protein interactions as an aid to serum protein fractionation (Anderson, A. J.) 45P
Muramic acid phosphate of glycosaminopeptide, linkage between teichoic acid and, in the walls of a strain of *Staphylococcus lactis* (Button, D., Archibald, A. R. & Baddiley, J.) 11C
Muscle, heart, rat, effect of diabetes on the concentration of amino acids in (Scharff, R. & Wool, I. G.) 173
Muscle, lobster, amino acid composition of arginine kinase from (Virden, R. & Watts, D. C.) 159
Muscle, lobster, molecular weight of arginine kinase from (Virden, R., Watts, D. C., Watts, R. L., Gammack, D. B. & Raper, J. H.) 155
Myosins, differences in, of the red and white muscles of the pigeon (Maddox, C. E. R. & Perry, S. V.) 8P

2-Naphthylamine, metabolism of, in dogs and rats (Boyland, E. & Manson, D.) 189
Neurospora crassa, hybridization *in vitro* between wild-type and mutant forms of glutamate dehydrogenase from (Coddington, A.) 9C
Nicotinamide–adenine dinucleotide phosphate, turnover of, in rat liver (Slater, T. F.) 2P
Nicotinamide–adenine dinucleotide, reduced, and the cytochrome system in mammalian and yeast respiratory-chain preparations, electron transfer between (Tyler, D. D. & Gonze, J.) 10P
Nicotinamide–adenine dinucleotide, reduced, some rate constants for the phenazine methosulphate-catalysed oxidation of (Ottaway, J. H.) 253
Nicotinamide nucleotides, changes in the intracellular concentrations of, during the aerobic growth cycle of yeast, on different carbon sources (Polakis, E. S. & Bartley, W.) 521
p-Nitrophenyl glucuronide, formation of, by rabbit liver (Tomlinson, G. A. & Yaffe, S. J.) 507
Noradrenaline, synthesis of, by isolated guinea-pig atria (Merrills, R. J. & Offerman, J.) 538
Norbiotin, effect of, on ornithine carbamoyltransferase synthesis in yeast (Dixon, B. & Rose, A. H.) 513
Novikoff ascites-hepatoma cells, Crabtree effect in (Nigam, V. N.) 413

Nuclei, evidence for the presence of spermidine and spermine in, of rat liver and calf thymus gland (Stevens, L.) 11P
Nucleic acids, isolation of, from *Drosphila melanogaster* (Hastings J. R. B. & Kirby, K. S.) 19P
Nucleotides, incorporation of, into ribonucleic acid by extracts from rat-liver microsomes (Page, M. G. & Klemperer, H. G.) 54P

Oat glucan, enzymic hydrolysis of, by *Aspergillus niger* β-(1→4)-glucan hydrolase (Clarke, A. E. & Stone, B. A.) 582
Oestrogen, biosynthesis of, *in vitro* by adrenal tissue from the golden hamster (Lawrence, J. R. & Griffiths, K.) 27C
Ornithine carbamoyltransferase, specific requirement for biotin in the synthesis of, by yeast (Dixon, B. & Rose, A. H.) 513
Osmium tetroxide, action of, on amino acid-transfer ribonucleic acid, and correlations between the genetic code and the sensitivity of acceptor activity (Burton, K., Varney, N. F. & Zamecnik, P. C.) 29C
Ovalbumin, hen, structural aspects of the immunological cross-reaction of genetic variants of (Wiseman, R. L. & Fothergill, J. E.) 58P
Ovalbumins, hen and duck, structural aspects of the immunological cross-reaction of (Fothergill, J. E. & Perrie, W. T.) 58P
Oxalic acid, use of Sephadex G-25 for the rapid determination of, in biological materials (Zarembski, P. M., Hodgkinson, A. & Knowles, C. F.) 32P
17-Oxo steroid glucosiduronates and sulphates in human urine, indirect analysis of (Menini, E.) 747
Oxytocin, inactivation of, by hypothalamic enzymes in pregnant and non-pregnant rabbits (Hooper, K. C.) 128

Pancreozymin, effect of, on the metabolism of ribonucleic acid by canine pancreas (Dickman, R. & Yang, J.) 56P
Parenchymal cells, rat-liver, uptake of homologous ribonucleic acid by suspensions of (Shanmugam, G. & Bhargava, P. M.) 297
Patella vulgata, acidimetric assay of glycosulphatase from, acting on some monosaccharide sulphates, by using a pH-stat (Lloyd, P. F. & Stuart, C. H.) 37P
Peptides, method for the separation of α-amino acids from (Tommel, D. K. J., Vliegenthart, J. F. G., Penders, T. J. & Arens, J. F.) 48P
Peroxidase and manganous ions, oxidation of Schiff bases of pyridoxal and pyridoxal phosphate with amino acids by (Hill, J. M. & Mann, P. J. G.) 454
Peroxides, lipid, formation of, in lysosomes as a result of irradiation (Wills, E. D. & Wilkinson, A. E.) 657
Peroxides, lipid, mechanisms of formation of, in animal tissues (Wills, E. D.) 667
Phenazine methosulphate, some rate constants for the oxidation of reduced nicotinamide–adenine dinucleotide catalysed by (Ottaway, J. H.) 253
Phenol, interactions of proteins with other polyelectrolytes in a two-phase system containing aqueous buffers at various pH values and (Pusztai, A.) 93
Phosphatase, alkaline, calf-intestinal, substrate specificity of (Fernley, H. N. & Walker, P. G.) 39P
Phosphatase, alkaline, human, association of pyrophosphatase activity with preparations of (Moss, D. W., Eaton, R. H., Smith, J. K. & Whitby, L. G.) 19P
Phosphatase, alkaline, human-kidney, effect of urea on (Butterworth, P. J. & Moss, D. W.) 9P
Phosphatidylglycerylglucosamine (Phizackerley, P. J. R., MacDougall, J. C. & Francis, M. J. O.) 21C
Phosphofructokinase, metabolic regulation of, in kidney cortex (Newsholme, E. A. & Underwood, A. H.) 24C
6-Phosphogluconate dehydrogenase, effects of ethionine and azo-dye treatments on the activity of, in rat liver (McLean, P.) 776
Phosphogluconate dehydrogenase, erythrocyte, human, differential inhibition of variants of (Carter, N. D., Gould, S. R., Parr, C. W. & Walter, P. H.) 17P
Phytosterols, biosynthesis of (Goad, L. J. & Goodwin, T. W.) 735
Phytosterols, stereospecific biosynthesis of (Rees, H. H., Mercer, E. I. & Goodwin, T. W.) 726
Pituitary gland, bovine, isolation of a new hormone-binding protein from the posterior lobe of (Hope, D. B. & Hollenberg, M. D.) 5P
Plant cells, intracellular localization of mevalonate-activating enzymes in (Rogers, L. J., Shah, S. P. J. & Goodwin, T. W.) 381
Plant tissues, a specific sucrose phosphatase from (Hawker, J. S. & Hatch, M. D.) 102
Plants, higher, biosynthesis of phytosterols in (Goad, L. J. & Goodwin, T. W.) 735
Plants, higher, stereospecific biosynthesis of phytosterols and α- and β-amyrin in (Rees, H. H., Mercer, E. I. & Goodwin, T. W.) 726
Plasma, detection and determination of adenosine diphosphate and related substances in (Ireland, D. M. & Mills, D. C. B.) 283
Plasma, rat, effect of diabetes on the concentration of amino acids in (Scharff, R. & Wool, I. G.) 173
Platelets, effect of, on metabolism of adenosine diphosphate added to plasma (Ireland, D. M. & Mills, D. C. B.) 283
Polygalacturonic acid, interactions of, with proteins in a two-phase system containing phenol and aqueous buffers at various pH values (Pusztai, A.) 93
Polypeptide–carbohydrate bonds in acidic glycoproteins of guinea-pig serum (Cunningham, W. L. & Simkin, J. L.) 434
Polypeptides, incorporation of amino acids into, in cell-free systems and the attachment of rapidly labelled ribonucleic acid to ribosomes (Wilkinson, B. R. & Kirby, K. S.) 786
Polyphosphates, endogenous metabolism of, in two photosynthetic micro-organisms (Carr, N. G. & Sandhu, G. R.) 29P
Polyribonucleotides, synthesis of, by cytoplasmic enzymes of Landschütz ascites-tumour cells (Wykes, J. R. & Smellie, R. M. S.) 347
Polysomes, preparation of, from *Bacillus megaterium* (Barker, G. R. & Pooley, H. M.) 30P
Polysomes, rat-liver, morphological origin and function of (Campbell, P. N., Lowe, E. & Sharp, M. D. B.) 22C
Polyuridylic acid, stimulation of incorporation of amino acids into polypeptides in cell-free systems by (Wilkinson, B. R. & Kirby, K. S.) 786
Potassium ions, induced and spontaneous movements of, into mitochondria (Harris, E. J., Cockrell, R. & Pressman, B. C.) 200
Potassium, metabolism of, in *Aerobacter aerogenes* (Dicks, J. W. & Tempest, D. W.) 7P
Progesterone, metabolites of, in the urine of pregnant women (James, F., Fotherby, K. & McNaughton, M. C.) 13P
Propionate, growth of *Aspergillus glaucus* sp. on (Richards, S. A. & Lloyd, D.) 56P
Prostate, human, catabolism of [4-^{14}C]testosterone by subcellular fractions of (Chamberlain, J., Jagarinec, N. & Ofner, P.) 610
Protein, inhibitory effect of salicylate on the incorporation of L-[U-^{14}C]leucine into, of rat tissue preparations *in vitro* (Dawkins, P. D., Gould, B. J. & Smith, M. J. H.) 703
Protein, stimulation by insulin of the formation of, by mammary tissues *in vitro* (Mayne, R., Barry, J. M. & Rivera, E. M.) 688
Proteins, interactions of, with other polyelectrolytes in a two-phase system containing phenol and aqueous buffers at various pH values (Pusztai, A.) 93

Proteins, serum, mucopolysaccharide–protein interactions as an aid to fractionation of (Anderson, A. J.) 45P
Protoplasts, formation of, by the action of snail (*Helix pomatia*) digestive juice on yeast (Anderson, F. B. & Millbank, J. W.) 682
Prototheca zopfii, chemical composition and structure of the cell wall of (Turner, G. & Lloyd, D.) 55P
Pseudomonas AM1, role of folate in the metabolism of (Hollinshead, J. A.) 389
Pseudomonas methanica, incorporation of C_1 units into allulose phosphate by extracts of (Kemp, M. B. & Quayle, J. R.) 41
Pyridoxal and pyridoxal phosphate, oxidation by manganous ions and peroxidase of Schiff bases of amino acids with (Hill, J. M. & Mann, P. J. G.) 454
Pyrophosphatase activity, association of, with human alkaline-phosphatase preparations (Moss, D. W., Eaton, R. H., Smith, J. K. & Whitby, L. G.) 19P

Radium, metabolism of, in dairy cows (Sansom, B. F. & Garner, R. J.) 677
Renin, pig, purification of (Peart, W. S., Lloyd, A. M., Thatcher, G. N., Lever, A. F., Payne, N. & Stone, N.) 708
Retina, alcohol-dehydrogenase activity of, in the normal and dystrophic rat (Reading, H. W. & Sorsby, A.) 3C
Retinal in the blood and liver of the fowl in relation to sex and maturity (Plack, P. A., Miller, W. S. & Ward, C. M.) 71
Ribonucleic acid as primer in the synthesis of polyribonucleotides by cytoplasmic enzymes of Landschütz ascites-tumour cells (Wykes, J. R. & Smellie, R. M. S.) 347
Ribonucleic acid, effect of cycloheximide on the synthesis of, in *Saccharomyces carlsbergensis* (de Kloet, S. R.) 566
Ribonucleic acid, effects of pancreozymin, urecholine and actinomycin D on the metabolism of, by canine pancreas (Dickman, R. & Yang, J.) 56P
Ribonucleic acid, homologous, uptake of, by rat-liver parenchymal cells in suspension (Shanmugam, G. & Bhargava, P. M.) 297
Ribonucleic acid, incorporation of nucleotides into, by extracts from rat-liver microsomes (Page, M. G. & Klemperer, H. G.) 54P
Ribonucleic acid, rapidly labelled, attachment of, to ribosomes and stimulation of the incorporation of amino acids into polypeptides in cell-free systems (Wilkinson, B. R. & Kirby, K. S.) 786
Ribonucleic acid, rapidly labelled, in cell fractions of rat liver and in tumour tissues (Wilkinson, B. R. & Kirby, K. S.) 780
Ribonucleic acid, stimulation by insulin of the formation of, by mammary tissues *in vitro* (Mayne, R., Barry, J. M. & Rivera, E. M.) 688
Ribonucleic acid synthesized by isolated rat-liver nuclei, hybridization of, with homologous deoxyribonucleic acid (Blackburn, K. J. & Klemperer, H. G.) 54P
Ribonucleic acid, transfer, action of osmium tetroxide on, and correlations between the genetic code and the sensitivity of acceptor activity (Burton, K., Varney, N. F. & Zamecnik, P. C.) 29C
Ribonucleic acids, interactions of, with proteins in a two-phase system containing phenol and aqueous buffers at various pH values (Pusztai, A.) 93
Ribonucleotide homopolymers, synthesis of, by cytoplasmic enzymes of Landschütz ascites-tumour cells (Wykes, J. R. & Smellie, R. M. S.) 347
Ribosomes, attachment of rapidly labelled ribonucleic acid to, and stimulation of the incorporation of amino acids into polypeptides in cell-free systems (Wilkinson, B. R. & Kirby, K. S.) 786
Rumen, bovine, incubations inside (Czerkawski, J. W.) 39P

Saccharomyces carlsbergensis, effect of cycloheximide on ribonucleic acid synthesis in (de Kloet, S. R.) 566
Saccharomyces carlsbergensis, protoplast formation by the action of snail (*Helix pomatia*) digestive juice on (Anderson, F. B. & Millbank, J. W.) 682
Saccharomyces cerevisiae, anaerobically grown, effect of metabolic inhibitors on the development of respiration in (Bartley, W. & Tustanoff, E. R.) 599
Saccharomyces cerevisiae, changes in the intracellular concentrations of adenosine phosphates and nicotinamide nucleotides during the aerobic growth cycle of, on different sources (Polakis, E. S. & Bartley, W.) 521
Saccharomyces cerevisiae, requirement for biotin in the synthesis of ornithine carbamoyltransferase by (Dixon, B. & Rose, A. H.) 513
Salicylate, inhibitory effect of, on the incorporation of L-[U-^{14}C]leucine into the protein of rat tissue preparations *in vitro* (Dawkins, P. D., Gould, B. J. & Smith, M. J. H.) 703
Scatchard equation, modification of, for the presence of a complex-forming agent (Clarkson, T. W. & Magos, L.) 62
Schiff bases of pyridoxal and pyridoxal phosphate with amino acids, oxidation of, by manganous ions and peroxidase (Hill, J. M. & Mann, P. J. G.) 454
Serum, guinea-pig, glyceropeptides derived from acidic glycoproteins of (Cunningham, W. L. & Simkin, J. L.) 434
Sex and maturity, retinal in the blood and liver of the fowl in relation to (Plack, P. A., Miller, W. S. & Ward, C. M.) 71
Shikimic acid, incorporation of, into bacilysin (Roscoe, J. & Abraham, E. P.) 793
Sodium chloride, specific requirement for, for the active uptake of L-glutamate by *Halobacterium salinarium* (Stevenson, J.) 257
Sodium, minimum structural requirements for the formation of complexes between organic metabolites and (Barclay, J. A., Hickling, M. J. & White, K.) 11P
Spermidine and spermine, evidence for the presence of, in the nuclei of rat liver and calf thymus gland (Stevens, L.) 11P
Squalene and 26-hydroxycholesterol in the human atheromatous plaque (Steel, G., Brooks, C. J. W. & Harland, W. A.) 51P
Staphylococcus lactis, linkage between teichoic acid and glycosaminopeptide in the walls of a strain of (Button, D., Archibald, A. R. & Baddiley, J.) 11C
Starvation and re-feeding, effects of, on lipogenesis and cholesterol synthesis (Jansen, G. R., Zanetti, M. E. & Hutchison, C. F.) 333
Starvation, effect of, on conversion of glucose into fat and turnover of newly synthesized fat (Jansen, G. R., Hutchison, C. F. & Zanetti, M. E.) 323
Steroid hormones, effect of vitamin A deficiency on the biosynthesis of, in rats (Juneja, H. S., Murthy, S. K. & Ganguly, J.) 138
Sterols, plant, biosynthesis of (Goad, L. J. & Goodwin, T. W.) 735
Sterols, plant, stereospecific biosynthesis of (Rees, H. H., Mercer, E. I. & Goodwin, T. W.) 726
Succinate, role of folate in the metabolism of *Pseudomonas* AM1 grown on (Hollinshead, J. A.) 389
Sucrose phosphatase, specific, from plant tissues (Hawker, J. S. & Hatch, M. D.) 102
Sucrose, some alternatives to, for density-gradient centrifugation (Parish, J. H., Hastings, J. R. B. & Kirby, K. S.) 19P
Sulphate activation and sulphotransferase in foetal guinea pigs and in developing hen's eggs (Spencer, B. & Raftery, J.) 35P
Sulphate esters, whole-body radioautography as applied to the study of (Powell, G. M. & Curtis, C. G.) 34P

Sulphates and glucosiduronates of 17-oxo steroids in human urine, indirect analysis of (Menini, E.) 747
Sulphonamides and the microbial synthesis of folic acid (Hutchison, R. M.) 23P
Sulphotransferase and sulphate activation in foetal guinea pigs and in developing hen's eggs (Spencer B. & Raftery, J.) 35P

Tannase, esterase and depsidase activities of (Haslam, E. & Stangroom, J. E.) 28
Teichoic acid, function of (Baillie, R. D. & Holms, W. H.) 28P
Teichoic acid–glycosaminopeptide linkage in the walls of a strain of *Staphylococcus lactis* (Button, D., Archibald, A. R. & Baddiley, J.) 11C
Terpenoids, incorporation of carbon dioxide and mevalonic acid into, by higher plants during chloroplast development (Treharne, K. J., Mercer, E. I. & Goodwin, T. W.) 239
[4-^{14}C]Testosterone, catabolism of, by subcellular fractions of human prostate (Chamberlain, J., Jagarinec, N. & Ofner, P.) 610
Testosterone, urinary, method for the estimation of (Ismail, A. A. A. & Harkness, R. A.) 717
Tetrazolium salts, use of, in the enzymic estimation of glutamate (Sowerby, J. M. & Ottaway, J. H.) 246
Thiamine, transport and metabolism of, in Ehrlich ascites-carcinoma cells (Menon, I. A. & Quastel, J. H.) 766
Thiol groups as mercury-binding sites in kidney and liver (Clarkson, T. W. & Magos, L.) 62
Thiol groups in aspartate aminotransferase from ox heart (Marino, G., Scardi, V. & Zito, R.) 595
Thiol groups, reactivity of, in the leucocyte (Woodin, A. M. & Wieneke, A. A.) 469
Thiol groups, role of, in the structure and mechanism of action of arginine kinase (Virden, R. & Watts, D. C.) 162
L-Threonine dehydrogenase, activity of, in extracts of *Escherichia coli* (Turner, J. M.) 427
Thymus, calf, interactions of histone fractions from, in aqueous solution with 8-anilinonaphthalene-1-sulphonic acid (Laurence, D. J. R.) 419
Thyrocalcitonin, pig, isolation of (Gudmundsson, T. V., Byfield, P. G. H., de Bats, A., Slack, E., Katz, F. E. & MacIntyre, I.) 14P
Thyroxine glucuronide, excretion of, in cat bile after injection of thyroxine (Myant, N. B.) 341
3,3′,5′-Tri-iodothyronine glucuronide, excretion of, in cat bile after injection of thyroxine (Myant, N. B.) 341
Trimethylsilyl ethers, thin-layer chromatography of (Brooks, C. J. W. & Carrie, J. G.) 47P
Tropomyosin, 'natural', and the factor sensitizing actomyosin adenosine triphosphatase to ethylenedioxybis-(ethyleneamino)tetra-acetic acid (Perry, S. V., Davies, V. & Hayter, D.) 1C
L-Tyrosine *O*-sulphate, free, possible route to the production of, by the rat (Basford, J. M., Jones, J. G., Rose, F. A. & Dodgson, K. S.) 534
L-Tyrosylglycine *O*[^{35}S]-sulphate, fate and distribution of, in mice and rats (Jones, J. G., Powell, G. M., Curtis, C. G. & Basford, J. M.) 35P
L-Tyrosylglycine *O*[^{35}S]-sulphate, metabolism of, by the rat (Basford, J. M., Jones, J. G., Rose, F. A. & Dodgson, K. S.) 534

Ubiquinone in the electron-transport system of *Azotobacter vinelandii* (Knowles, C. J. & Redfearn, E. R.) 33P

Udder, goat, perfused, isolated, fate of acetyl groups derived from glucose in (Hardwick, D. C.) 228
Ultrafiltration, rapid, simple apparatus for (Knowles, C. F.) 40P
Urea, effect of ethionine treatment on the activity of enzymes concerned with the synthesis of, in rat liver (McLean, P.) 776
Urea, effect of, on human kidney alkaline phosphatase (Butterworth, P. J. & Moss, D. W.) 9P
Urea, splitting of α-crystallin into sub-units induced by (Wisse, J. H., Zweers, A., Jongkind, J. F., Bont, W. S. & Bloemendal, H.) 179
Urecholine, effect of, on the metabolism of ribonucleic acid by canine pancreas (Dickman, R. & Yang, J.) 56P
Uridine diphosphate glucuronyltransferase, development of, in several tissues of the domestic fowl (Dutton, G. J. & Ko, V.) 550
Urine, human, indirect analysis of 17-oxo steroid glucosiduronates and sulphates in (Menini, E.) 747
Urine, method for the estimation of testosterone in (Ismail, A. A. A. & Harkness, R. A.) 717

Valine, incorporation of, by preparations from the developing rat brain (Adams, D. H. & Lim, L.) 261
Valinomycin, effects of, on induced and spontaneous movements of potassium ions into mitochondria (Harris, E. J., Cockrell, R. & Pressman, B. C.) 200
Varanic acid, chemical nature of (Collings, B. G. & Haslewood, G. A. D.) 50P
Venom, *Laticauda semifasciata*, crystallization of erabutoxins a and b from (Tamiya, N. & Arai, H.) 624
Visual pigment and indicator yellow analogues formed from 5,6-monoepoxyretinal (Lakshmanan, M. R. & Cama, H. R.) 87
Vitamin A activity of 3-dehydrovitamin A in the rat (John, K. V., Lakshmanan, M. R. & Cama, H. R.) 312
Vitamin A alcohol, inhibition of the oxidation of, by vitamin E (Lucy, J. A.) 57P
Vitamin A_1 aldehyde, *see* Retinal
Vitamin A, conversion of 5,6-monoepoxy-β-carotene into, in the small intestine (Subbarayan, C., Lakshmanan, M. R. & Cama, H. R.) 308
Vitamin A, effect of deficiency of, on the biosynthesis of steroid hormones in rats (Juneja, H. S., Murthy, S. K. & Ganguly, J.) 138
Vitamin E, inhibition of the oxidation of vitamin A alcohol by (Lucy, J. A.) 57P

Yeast, anaerobically grown, effect of metabolic inhibitors on the development of respiration in (Bartley, W. & Tustanoff, E. R.) 599
Yeast, changes in the intracellular concentrations of adenosine phosphates and nicotinamide nucleotides during the aerobic growth cycle of, on different carbon sources (Polakis, E. S. & Bartley, W.) 521
Yeast, effect of cycloheximide on ribonucleic acid synthesis in (de Kloet, S. R.) 566
Yeast, protoplast formation by the action of snail (*Helix pomatia*) digestive juice on (Anderson, F. B. & Millbank, J. W.) 682
Yeast, specific requirement for biotin in the synthesis of ornithine carbamoyltransferase by (Dixon, B. & Rose, A. H.) 513

Zymograms, development of, by the paint-brush technique (Fitch, L. I. & Parr, C. W.) 20P
